

2018: First Quarter News

Welcome to The Connector, a quarterly newsletter featuring the latest in product news, industry resources and events for the ProAV market.

DisplayPort vs. HDMI: Which is best for your audio-video project?

When it comes to display interfaces, not all are created equal. Although both DisplayPort and HDMI are capable of sending high-definition video and audio with HDCP from a source device to a display, there are differences worth noting. In this article, we'll discuss the key considerations to help you choose between the two interfaces for your next commercial or residential custom installation. [Read more.](#)
